

LibidoStim-F™

Natural Support for healthy female sexual desire

This blend of nutraceutical and herbal ingredients is designed to promote healthy female sexual desire and pleasure. While many factors can contribute to decreased libido, this product aims to help optimize hormone balance, blood flow, and adrenal function.

Ingredients in this formula provide subtle and safe support to the body's natural ability to regulate and balance the hormones estrogen, progesterone and even testosterone. While testosterone is usually referred to as the male sex hormone, it also plays a role in the female body, having a positive influence on sexual desire and potentially helping to manage an occasionally low sex drive.

All herbs used in this formula have been standardized to ensure quality and a consistent amount of their beneficial chemical compounds.

Highlights

- **Damiana (*Turnera diffusa*)** acts as an 'aromatase inhibitor,' meaning it promotes a balance of testosterone to estrogen that may be helpful in supporting sexual desire.
- **Tribulis (*Tribulus terrestris*)** may help with healthy female libido by supporting the natural production of androgens.
- **DHEA (dehydroepiandrosterone)**, a naturally occurring compound in the body which converts into hormones such as estrogen and testosterone.
- **DIM (Diindolylmethane)**, a nutrient naturally present in some foods; it may be useful because of its potential to encourage optimal conversion of estrogen to a more favorable balance of estrogen fractions.
- **Phosphatidylcholine** can help promote hormone balance by enabling the liver to convert estradiol -the stronger form of estrogen, to estriol -a less potent form of estrogen.
- **Chinese Ginseng, Horny Goat Weed and Ginkgo Biloba** are herbs that support blood flow and adrenal health, which are also important factors in positively influencing sexual desire.

Recommended Use: Take two capsules per day, or as directed by your health care practitioner.

Women with hirsutism or PCOS (polycystic ovary syndrome) should not use this product without permission from their health care practitioner.
